*Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a solar still, classified in class 202, subclass 234.
- II. Claims 19-20 drawn to a method of distilling a feed liquid to produce a desired distillate, classified in class 203, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as e.g., passive solar energy conversion apparatus wherein feedwater circulates through an extended, at least partly hollow, absorber body; and an active solar energy conversion apparatus comprising parabolic trough reflector as recognized by applicants, described at the paragraph bridging pages 1 and 2 of the specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 703-308-3844. The examiner can normally be reached on Tuesday-Friday; 7:30AM-6:00PM.
